

ENDPOINT ENCRYPTION

IT'S 10 P.M. DO YOU KNOW WHERE YOUR DEVICE IS?

MISSING

HAVE YOU SEEN THIS LAPTOP?

SECURE YOUR DATA

Endpoint Encryption gives you the ability to lock down your employees' devices so that in the event that they lost their device or it has been stolen, you can keep the data on the device secure.

PROTECTION FROM THE UNKNOWN

Restrict what data is allowed to be put on a device via USB restriction rules, and secure data that is being transferred to a USB flash drive.

All things mobile.
SimplySecure™

Phones

Tablets / Pads

PCs & Laptops

Macs

USB Drives

LOSS PREVENTION

If a device is lost you can secure your data in many ways, like having the device shutdown upon 5 failed logins, a persistent shutdown mode or deleting the encryption key to wipe all the data off the device.
