

**MANAGED  
DETECTION  
& RESPONSE**

# BEHOLD THE POWER OF VISIBILITY.

## **YOUR OWN PERSONAL SURVEILLANCE TEAM**

Attacks on your system can happen without you noticing. Use MDR to gain the visibility you need to uncover incidents that would otherwise remain invisible and detect suspicious behavior before it starts.

## **UNKNOWN FILES INVADING YOUR SYSTEM?**

Malicious files look just like every other file on your system. MDR will detect new files being saved that didn't come from you. Giving you the peace of mind that unknown files won't enter your system.

## **TIME IS A HACKER'S BEST FRIEND**

Get time back on your side with MDR. Our tool provides a real time response to a potential attack that is isolated and cut off before it comes close to getting in your system.
