

## MULTI FACTOR AUTHENTICATION

# OUR ADVICE: PLAY HARD TO GET

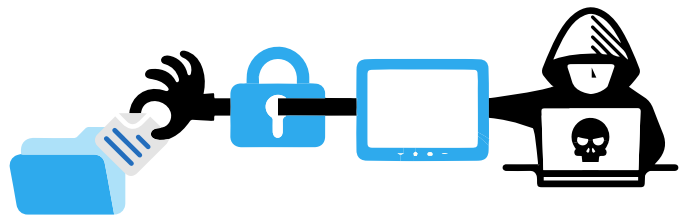

### ARE YOU REALLY WHO YOU SAY YOU ARE?

You never know ... a hacker may be logging into your accounts somewhere on the other side of the world. Prevent the chance with multifactor authentication to ensure you, are you!

### BLOCK ACCESS FROM OUTSIDE THREATS!

Did you know that 7 out of 10 businesses are not prepared to respond to a cyber-attack? Hackers are everywhere and know just when to strike. Don't be a statistic, stop hackers in their tracks with adaptive authentication and policy enforcement!

### COMPLIANCE WITHOUT THE HASSLE

How tired are you of rotating through passwords, month after month? Wouldn't you rather have stronger passwords without having to update each month? With Multi-Factor Authentication, you can. One click, and you're in - being compliant has never been so easy.
